Summary

Junior Software Developer experienced in cool technologies and cool jobs. Strong foundation in **cool programming languages, also one more language**, and maybe even more languages and frameworks. Experienced in communicating technical concepts and leading teams. Background in other cool profession.

Technical Skills

Languages: Java, Kotlin, Python, JavaScript, C/C++, SQL
Frameworks & Platforms: Jetpack Compose, React, Node.js
IoT & hardware: Arduino, ESP32
APIs & development: JUnit, Maven, CI/CD, REST APIs, OAuth, GitHub Actions
Tools: Git, Docker, IntelliJ, Android Studio, Visual Studio Code, Figma, Jira

Projects

Hundregistret: *Java, JUnit* *In development* GitHub
Java program for keeping track of dogs and their owners. Developed as a university project, with a focus on object-oriented programming and unit testing.

Personal website: *JavaScript, REST APIs, GitHub Actions, GitHub Pages* Demo GitHub
Web project visualising activity using API and anotherAPI, with automated JSON synchronisation and deployment.

Language project: *Lox, Java* *University project* GitHub
Adaptation of a programming language for simulating something useful and relevant from real life. Implemented in Java, with a custom interpreter and compiler.

Experience

Programming Educator **Sep 2026 – Present**
Relevant Coding School
Teaching programming at the School in City.

- I teach a language to students, focusing on programming concepts and problem solving.

Tutor: Important Uni Course **Nov 2024 – Present**
Important University Course
Working as a tutor for a university course.

- Support students in developing skills to independently solve programming problems.
- Language X, Framework Y, OOP.** Debugging, code structure, conceptual understanding and project work.

Teacher’s Assistant: A very important course **Mar 2025 – Jun 2026**
University of [City]
Supervised 9000+ students during laboratory work and individual projects in many specific frameworks.

- Web: HTML, CSS, JavaScript.
- Mobile: **Kotlin/Jetpack Compose** for Android, Swift/SwiftUI for iOS.
- IoT development: **C/C++**, cool microcontroller 1, hardware 2.
- Troubleshoot software, hardware and integration issues.

Team Lead **Mar 2024 – Jun 2026**
A nice organisation
Led a team of 1000 people at a place.

- Developed course materials in cool languages.
- Planned, structured and evaluated stuff.

Education

BSc in Subject **Aug 2023 – Present**
University, The Institution of Learning Things
BSc in Subject, with a focus on good things to have learned. Relevant courses include: Course 1, Course 2, Course 3.

- Exchange semester at Other University in City:**
Course Highlight 1, Highlight 2, Highlight 3.

Another Course That is Relevant still **Feb 2023 – May 2023**
Other School
Vocational education in a relevant topic.
